

DLY vs TFB Growth Axis: Validated Hepatokine → Muscle Signaling

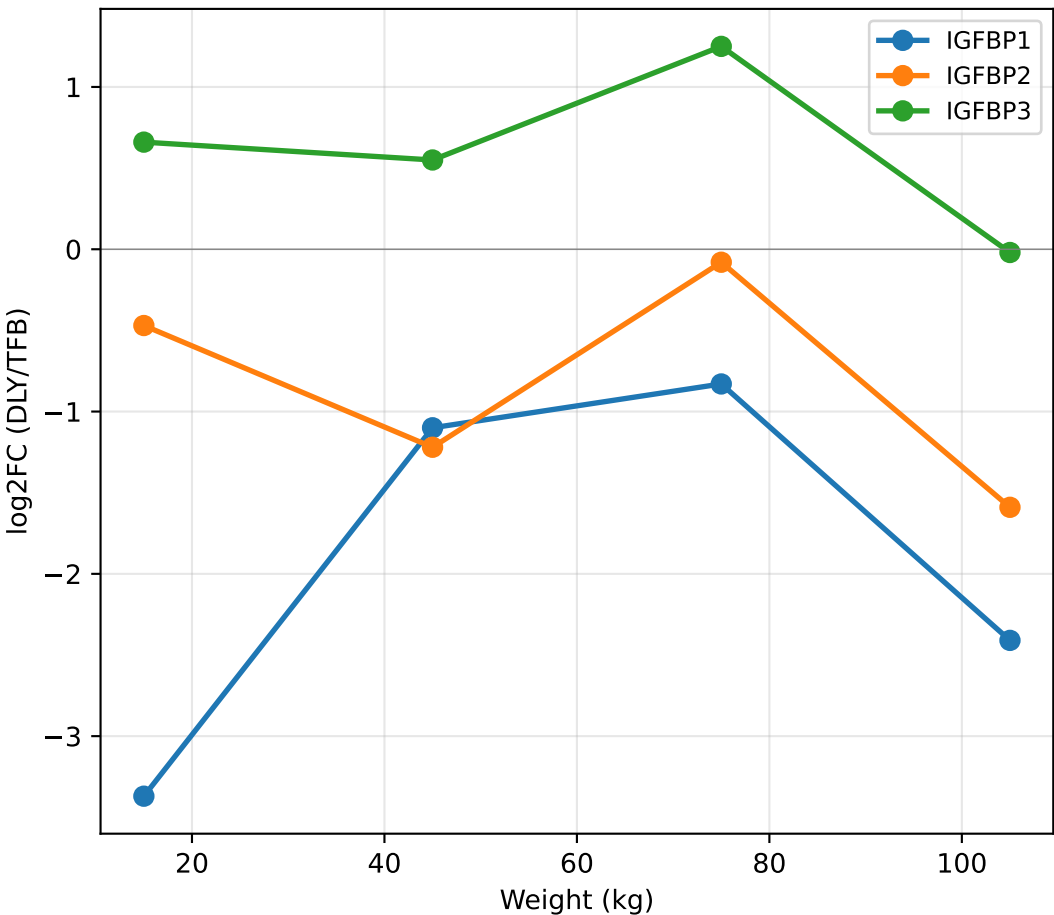

Panel A: IGF1 — Validated $r=0.95$
Strongest coordinated hepatokine

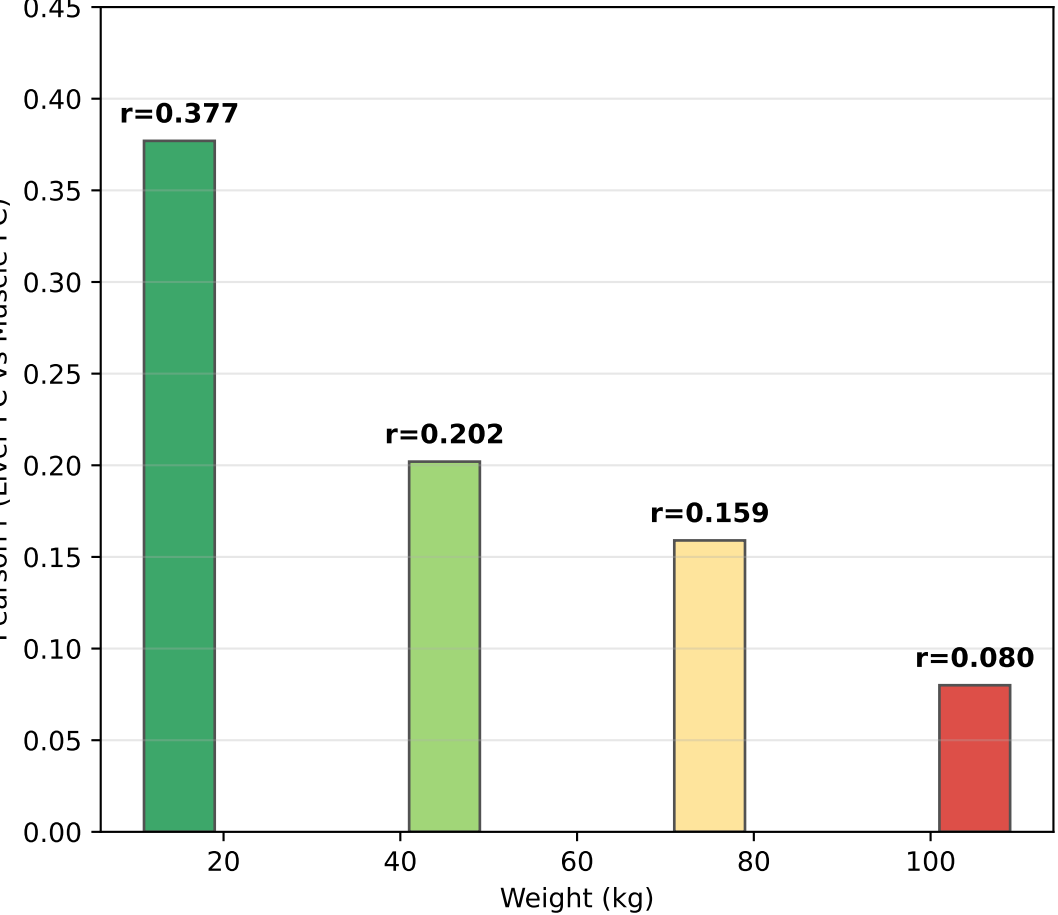

Panel B: FST-MSTN-ACVR2B Axis
FST→ACVR2B receptor $r=0.95$

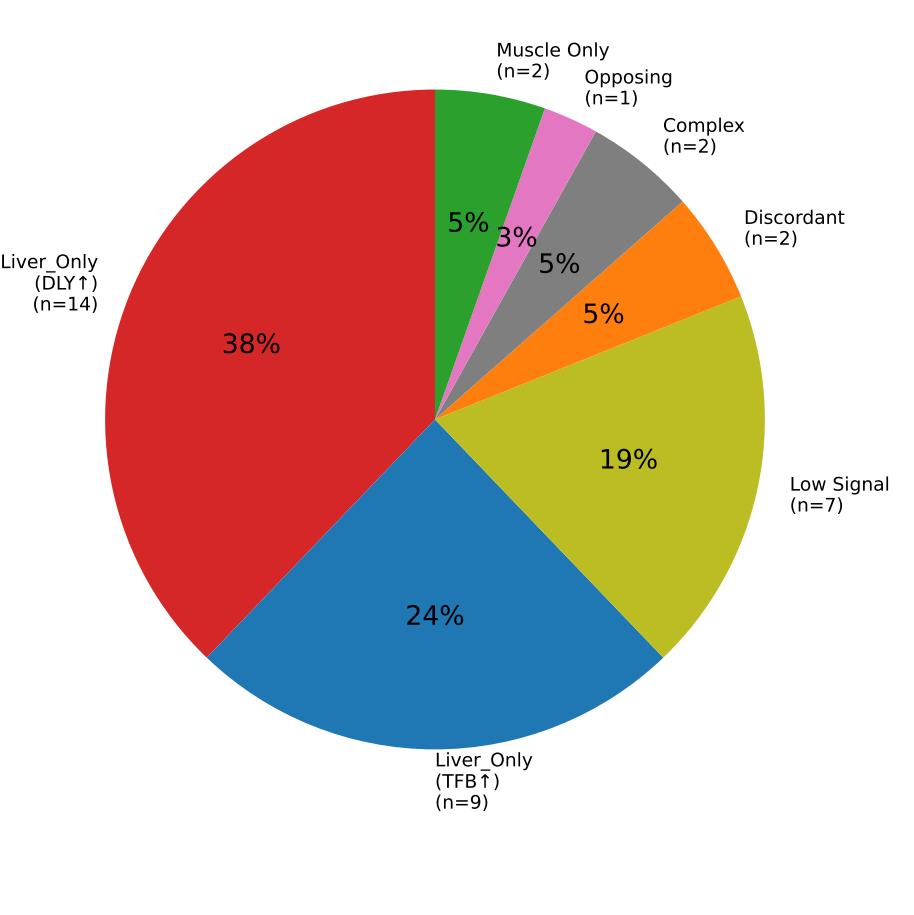

Panel C: IGFBP Family in Liver
IGFBP1 = strongest TFB-up signal

Panel D: Cross-Tissue Correlation DECLINES
(7464 common genes)

Panel E: Hepatokine Signaling Classification
(37 hepatokines/myokines)

Panel F: Receptor Usage in Muscle
ITGB1 = most shared receptor
